

Experiment 9:

Implement image as a button or link and set image as background

Exercise: Design a webpage which include image hyperlink and set any image as a background to the page.

Ans:

```
<!DOCTYPE html>

<html>

<body>

<h2>Image as a Link</h2>

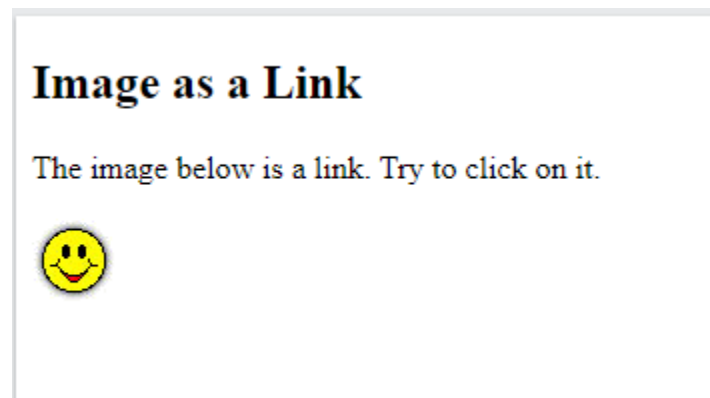

<p>The image below is a link. Try to click on it.</p>

<a href="default.asp"></a>

</body>

</html>
```

Output:

Now you can get a hand who acts as a hyperlink like hand ,then you can click there ,

Practical Related Questions:

1.Describe the use of images in webpages.

Ans: Image can be used as a hyperlink ,simply by replacing the text hyperlink with image code.

images are **used** for all kinds of reasons: to enhance **websites**, to illustrate stories, in ad displays, to present products or services, as stand-alone “a **picture** is worth a thousand words” meaning-rich tools, and sure, on social media.

2. Write the use of background attribute

Ans:- The background attribute can also be used to set the background of webpages.

Syntax:

```
<body background = "mypattern.gif"
```

Example:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
<style>
```

```
body {
```

```
    background-image: url('img_girl.jpg');
```

```
}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<h2>Background Image</h2>
```

```
<p>By default, the background image will repeat itself if it is smaller than the element where it is specified, in this case the body element.</p>
```

```
</body>
```

```
</html>
```

Output:

Background Image

By default, the background image will repeat itself if it is smaller than the element where it is specified, in this case the body element.

3.Explain the attributes used for setting the center alignment to the image.

Ans:- The align attribute is used for setting the center alignment to the image.

Conclusion: We create a webpage image as a button or link and set image as background
